IceWM

This documentation is meant to educate the user on the basics of using the IceWM desktop environment.

IceWM contains one menu that allows the user to access Applications, change system settings and log off. This menu is located in the lower left-hand corner and is branded **IceWM**.

- Programs can be launched via the **IceWM** menu.
 Certain applications can be found in their respective categories located in the IceWM menu. For example, Ansys is located in the Science, Engineering and Math Applications submenu.

- A user can also log off from this menu.
